Set-up Guide

1. Connect

- Connect the power cable, and ethernet cable (if available)

2. Set preferences

- Set operating language: scroll ▼, then ENTER to confirm
- If no ethernet is detected:
  - ENTER to scan for Wifi networks, scroll ▼ to select, then ENTER to confirm
  - Input password: Use number keys, or scroll ▲▼ to select characters. Move cursor using ◀ ▶
  - ENTER to save password, then ▲ ENTER to continue
- Note 16-digit Laptop ID, then ENTER to exit set-up

3. Register Lapbox

For new clients: Create your account at **mastatestsystem.com**

For existing customers:

- Login to your **mastatestsystem.com** account
- Select "My Account" and "Register a Lapbox" from menu
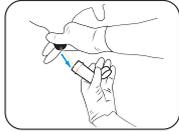

Caring for your Mastatest system

- Recommended room temperature of 5-30°C (41-86°F) for best performance
- Position Lapbox on a clean, dry desk space and handle with care
- Keep internal and external surfaces clean using a damp cloth (water only)
- Store cartridges at 2-8°C (35-46°F), and use before expiry date
